Center for Language Education (CLE) at the University of North Georgia (UNG) offers an Intensive English Program (IEP) that improves English for international students seeking admission to study in an American university or advance one’s career opportunities. The CLE’s IEP prepares students to successfully meet an American university classroom’s requirements of advanced reading, writing, speaking, listening and creative thinking skills. The CLE students study and live on the UNG campus; the IEP is a 16-week program that follows the same calendar as UNG. Here are some the highlights of the CLE’s exclusive and top-rated IEP:

- Learn how to write essays, read authentic college-level literature, take notes from a university lecture, deliver presentations, and participate in a classroom discussion.
- Develop creative thinking and communication skills.
- Receive individual attention in a class with fewer than 12 students.
- Observe university classes; partner with American students for conversation practice.
- Located in a picturesque region of the state, with natural beauty of mountains, streams, and forests.
- Live in a safe and beautiful campus; experience university life.
- Learn about American history, political system and culture through classes, regular field trips and cultural activities.
- Enjoy an excellent language environment – UNG’s international student population is less than 2%.
- No TOEFL will be required for undergraduate admission to UNG after successfully completed the advanced Intensive English Program (IEP).

University of North Georgia (UNG)
Dahlonega, Georgia, USA

- Founded in 1873, the student population is 15,000 located on four campuses.
- Incoming freshmen average GPA 3.62 and SAT 1121
- The five colleges offer more than 50 bachelor’s degrees and 13 master’s degree programs.
- Named one of the nation’s 100 best values in higher education by Kiplinger Personal Finance magazine.
- Mike Cottrell School of Business was accredited by the Association to Advance Collegiate School of Business (only 694 institutions hold AACSB accreditation in the world).
- A special dual bachelor’s degree program in physics and engineering between UNG and the No. 5 engineering institute in the U.S. -- Georgia Tech.
- UNG’s is a teaching institution; its low faculty to student ration enables the students to receive personal attention in and outside the classroom.
- UNG’s international student’s population is less than 2%, providing an excellent language environment for English learners.
- Dahlonega, Georgia (one hour from Atlanta) is a beautiful, safe, and friendly small town – one of the best places to start student life in the United States
