INTRODUCTION

Welcome to the master’s program in Clinical Mental Health Counseling at University of North Georgia. We are pleased that you selected UNG to pursue your graduate education, and we are committed to helping you make this a positive educational and personal growth experience. We hope to engage you in a professional preparation program that will be challenging and rewarding – challenging in the new knowledge and skills you will develop and rewarding as you become a competent counseling professional.

This is the Student Handbook for the Clinical Mental Health Counseling Program. It has been prepared to assist you in your program planning. You are responsible for comprehending and abiding by the policies contained in this handbook. We urge you to discuss questions you may have with your advisor or with other members of the counseling faculty. The information in this handbook is specific to the clinical mental health counseling master’s program. It includes course and clinical requirements, course sequencing, curriculum planning, procedures, comprehensive examination process, forms and policies.

Again, welcome to the program. We look forward to working with you.

General Information

The Master of Science degree in Clinical Mental Health Counseling (CMHC) is one of fourteen graduate programs offered at University of North Georgia. The department is housed within College of Health Sciences & Professions.

Students who successfully complete CMHC degree are eligible to enter a variety of occupations within the counseling and mental health field. Graduates are prepared to function as counselors in mental health centers, community agencies, governmental agencies, employee assistance programs, prisons, psychiatric hospitals, drug and alcohol abuse treatment programs, college and university counseling centers, religious settings, and private practice. The curriculum addresses theories of counseling and psychotherapy; individual and group counseling; career theory and counseling; human development; counseling ethics, assessment & diagnosis; and the needs of individuals from diverse. Utilizing problem based learning and incorporating required internships and practicum, the program provides students with both academic and practical professional experience and training. The CMHC program is also designed to meet the academic requirements for licensure as a professional counselor (LPC) in Georgia and certification by the National Board for Certified Counselors. Graduates are eligible for these credentials after successfully passing the appropriate exams and completing required post-degree supervised counseling experiences.

The Master of Science program in Clinical Mental Health Counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), a specialized accrediting body recognized by the Council on Post-secondary Accreditation (COPA).
About CACREP

The following information about CACREP is taken directly from its website at: http://www.cacrep.org/. For more information the reader is invited to visit this website.

The Council for Accreditation of Counseling and Related Educational Programs (CACREP) was formed in 1981. Often, as with CACREP, the specialized accrediting bodies have been organized by professional associations. The history of commitment to accreditation has been long and substantive by the American Counseling Association (ACA) and its respective divisions. Accreditation is viewed as a means of proactively strengthening our profession. Formed as a corporate affiliate of ACA, CACREP's mission coincides with that of ACA – to promote the advancement of quality educational program offerings.

In the United States, both the process and the condition of accreditation have a unique structure since accreditation is extended through nongovernmental, voluntary institutional agencies or professional associations. Therefore, the criteria for evaluation utilized by CACREP are the result of extensive input from educators, practitioners, and the public-at-large.

Department of Clinical Mental Health Counseling Mission Statement

The mission of the department is to provide a high-quality Master’s program in Clinical Mental Health Counseling by:

- Providing students with the most comprehensive and up-to-date knowledge and skills in the field of counseling
- Preparing students by exposing them to practical experiences in counseling settings
- Serving the region by preparing trained counselors for the North Georgia communities
- Providing training in diversity and in awareness of the impact of diversity on client populations and communities.
- Fostering an awareness of ethical, legal and spiritual factors in counseling
- Maintaining excellence in teaching, scholarship, and service for the faculty and students in the department.
- Providing services for the broader North Georgia communities through practicum placements, internships, and professional endeavors of those in the UNG Clinical Mental Health Counseling Program.

Objectives of the Program

The objectives of the Clinical Mental Health Counseling Program are based on current knowledge concerning the counseling and human development needs of a multicultural society. Developed in collaboration with current and former students, personnel from cooperating agencies, various accrediting agencies, and colleagues in this and other university settings, the counseling faculty identify objectives for the program. Students in the Clinical Mental Health Counseling Program will gain and demonstrate the following knowledge and skills:

1. Historical, philosophical, societal, cultural, economic, and political dimensions of, and current trends in the community human service/mental health movement;
2. Roles, functions, preparation standards, credentialing, licensure and professional identity of community counselors;
3. Policies, laws, legislation, recognition, reimbursement, right-to-practice, and other issues relevant to Clinical Mental Health Counseling;

4. Ethical and legal considerations specifically related to the practice of Clinical Mental Health Counseling (e.g. the ACA Code of Ethics);

5. The role of racial, ethnic, and cultural heritage, nationality, socioeconomic status, family structure, age, gender, sexual orientation, religious and spiritual beliefs, occupation, and physical and mental status, and equity issues in Clinical Mental Health Counseling;

6. The roles of community counselors in various practice settings and the relationships between counselors and other professionals in these settings;

7. Organizational, fiscal, and legal dimensions of the institutions and settings in which community counselors practice;

8. Strategies for community needs assessment to design, implement, and evaluate Clinical Mental Health Counseling interventions, programs, and systems; and general principles of community intervention, consultation, of human services, programs and networks (public, private, and volunteer) in local communities;

9. Characteristics of individuals and communities served by a variety of institutions and agencies that offer Clinical Mental Health Counseling services;

10. Models, methods, and principles of program development and service delivery for a clientele based on assumptions of human and organizational development, including prevention, implementation of support groups, peer facilitation training, parent education, career/occupational information and counseling, and encouragement of self-help;

11. Effective strategies for promoting client understanding of and access to community resources;

12. Principles and models of biopsychosocial assessment, case conceptualization, theories of human development and concepts of normalcy and psychopathology leading to diagnoses and appropriate counseling plans;

13. Knowledge of the principles of diagnosis and the use of current diagnostic tools, including the current edition of the Diagnostic and Statistical Manual of Mental Disorders;

14. Effective strategies for client advocacy in public policy and other matters of equity and accessibility; and application of appropriate individual, couple, family, group, and systems modalities for initiating, maintaining, and terminating counseling, including the use of crisis intervention, and brief, intermediate, and long-term approaches.
Admission to the MS Degree in Clinical Mental Health Counseling

For admission to the Clinical Mental Health Counseling Program, applicants must hold at least a bachelor’s degree from an accredited college or university and must meet other admissions requirements as described below. In addition, applicants must submit official transcripts from all institutions previously attended.

Consideration for admission as a regular, degree-seeking student also requires that the applicant submit satisfactory scores on the Graduate Record Exam (GRE). Only those scores, which are less than six years old, will be considered.

Recruitment Policy

Students are recruited and selected for admission to University of North Georgia Clinical Mental Health Counseling Program on the basis of scholastic achievement, aptitude for the study of counseling, and other personal qualifications. Because success in the Clinical Mental Health Counseling program depends on a number of related factors in a student's development, of which scholastic accomplishments are only a part, the Clinical Mental Health Counseling Program Admissions Committee also gives consideration to professional experience, personal background, and motivation. The UNG Clinical Mental Health Counseling Program recognizes the value of diversity and is committed to recruiting and admitting students who represent the cultural make-up of the region and state.

Admission Requirements

Admission and continued ability to register for courses in the Clinical Mental Health Counseling program is based on the candidate’s potential for graduate study, previous preparation and experience, and the possession of personal qualities that contribute to success as a counselor. Although no specific undergraduate major is required for admission to the program, students with backgrounds in related fields such as psychology, education, sociology, criminal justice, biology, and nursing are best prepared to enter the discipline.

Factors related to the admission process for the M.S. degree in Clinical Mental Health Counseling include:

- Academic potential as measured by undergraduate GPA and GRE (V+Q) scores
- Professional experience in the helping professions. A resume is required.
- Non-Academic experiences, which add breadth in understanding the human condition (e.g., experiences with special populations and life experiences showing excellent coping skills)
- Recommendations from persons able to address the student in the areas listed above
- A personal statement showing insight, awareness, and commitment to entering the counseling profession
  - Brief personal history
  - Description of your reasons for wanting to become a counselor
• Attributes you possess which would contribute to your effectiveness as a counselor
• Personal characteristics which may inhibit your relationships with clients and what you are doing to resolve those issues

Personal interview with Counseling Faculty

Clinical Mental Health Counseling Student Standings

Regular standing

Regular admission standing requires a minimum cumulative undergraduate grade point average (GPA) of at least 2.75 (4.0 scale) and an official Graduate Record Exam (GRE) score of not less than 290 (verbal and quantitative scores combined) if taken on or after August 1, 2011 (not less than 900 prior to August 1, 2011). Only GRE scores less than six years old will be considered.

Provisional Standing

Provisional admission standing requires a minimum cumulative grade point average of between 2.50 and 2.74 (4.0 scale) and at least 700 on the previous version of the GRE (Verbal+ Quantitative) or 281 on the current version of the GRE (Verbal+ Quantitative)

Post-Graduate Admission (Non-Degree)

Individuals holding a graduate degree from an accredited college or university may be admitted as a post-graduate student. Post-graduate students must submit an application for admission, application fee, an official transcript showing the graduate degree, and a certificate of immunization.

Transient

Transient admission may be granted to students in good standing at another institution who wish to enroll for one semester. The applicant must provide an application for graduate admission, application fee, certificate of immunization, and a letter of good standing (enclosed in an application packet).

Transfer hours

Students may transfer up to six semester hours of appropriate graduate credit earned at another institution into the Clinical Mental Health Counseling program. These credits must be acceptable to the Programs Admissions Committee. The rationale for this requirement is to maintain program integrity and ensure that students are receiving training in counseling that the degree implies.
Master of Science in Clinical Mental Health Counseling Degree Requirements

Graduation requirements for the Master of Science in Clinical Mental Health Counseling include:

1. Completion of 60 designated semester hours of study with a cumulative GPA of 3.0 or higher, with no grade of less than a B.
2. Successful passing of the comprehensive examination.
3. Satisfactory completion of practicum and internship requirements.
4. Completion of at least 54 hours of graduate degree requirements in residence, with no more than six hours of transfer credit.
5. Completion of all degree-related course requirements, including transfer credit, within a six-year period of admission semester.

Master of Science in Clinical Mental Health Counseling Courses

Professional Core (27 semester hours)

COUN 6000 Introduction to Clinical Mental Health Counseling (3)
This course provides an overview of the counseling profession including history, professional identity, and ethical/legal concerns. Students become familiar with multicultural diversity, research, and professional/organizational issues as they apply to the professional counselor.

COUN 6030 Life Span Development (3)
This course provides a framework of the theoretical understanding of human development from birth to later adulthood, including issues of gender, family and socialization. The course is intended to illustrate the normal developmental processes that occur over a life span and sensitize counselors to events that may lead to a disruption of events that may eventually lead a person to seek counseling.

COUN 6100 Psychological Helping Skills (3)
This is an introductory course for prospective counselors who seek to develop basic counseling skills and improve interpersonal effectiveness. The course is designed primarily as a personal experience in practicing newly acquired helping skills.

COUN 6200 Counseling Theory (3)
This course addresses current theories and emerging positions in counseling and psychotherapy with special emphasis on psychological change strategies and the techniques commonly used in implementing those strategies.

COUN 6300 Group Counseling (3)
This course provides the opportunity to learn and to apply various systems for group counseling, skills related to group leadership and member participation, goals of selected group systems, multi-cultural diversity issues affecting group systems, research relevant to group leadership and group systems, and ethical and legal issues related to group counseling. Prerequisite: Counseling Theory.

COUN 6400 Career Development Counseling (3)
This course is a survey of career development theories and counseling with an emphasis on multi-cultural diversity issues affecting career counseling, research relevant to career counseling, and ethical and legal issues.

COUN 6500 Multicultural Counseling (3)
This course enhances and advances knowledge, skills, and sensitivity to diverse populations in the counseling process. The student learns about the effects of culture, ethnicity, race, and gender on the development and functioning of the client as well as the attitude of the therapist.

COUN 6600 Psychological Assessment (3)
This course covers the historical, ethical/legal, and professional/organizational issues related to appraisal for counseling professionals. Students are provided with direct laboratory experiences in the professional use and interpretation of assessment tools with required supervision of an appropriately trained and licensed professional.
COUN 6700 Research Methods In Counseling (3)
Students study research methods, procedures, and designs as appropriate to the field of counseling, understanding that it is important for students to conduct research and appreciate the research designs used by counselors in the field. Preparation of research abstract, proposal, and design are also included.

Major (12 semester hours)

COUN 7000 Family Counseling (3)
This course provides a comprehensive exploration of the current theories/techniques of marriage, family, and couples counseling.

COUN 7100 Psychopathological Diagnosis (3)
This course is designed to assist students in the recognition and categorization of psychological and emotional patterns, which are considered dysfunctional, according to the classification system utilized by the American Psychiatric Association in their Diagnosis and Statistical Manual Disorders IV-TR (2000).

COUN 7200 Substance Abuse Counseling (3)
A study of behavioral and substance additions, including an overview of differential treatment.

COUN 7300 Advanced Clinical Mental Health Counseling (3)
The advanced clinical skills course is designed to address issues that affect clinical mental health counselors such as program development and management as well as trauma causing events and crisis management. The course will include models of supervision, documentation including progress notes, case conceptualization and treatment planning. Pre-requisites: COUN 6040, COUN 6100, COUN 6300, COUN 6700 and COUN 7100

Clinical Labs (6 Semester Hours)

COUN 6110 Psychological Helping Skills Lab (1)
The purpose of this lab is to practice beginning helping skills necessary to becoming an effective counselor. Each lab will require the student to be a helper, client and an observer. Co-requisite: COUN 6100

COUN 6210 Counseling Theories Lab (1)
This lab will allow students to practice counseling techniques that are consistent with current practice in the counseling field. Techniques will be introduced in the lecture course and students will have the opportunity to give and receive feedback to enhance skill development. Co-requisite: COUN 6200

COUN 6310 Group Counseling Lab (1)
This lab will allow students to participate in group process as well as facilitate a group. Techniques will be introduced in the lecture course and students will have the opportunity to give and receive feedback to enhance skill development. Co-requisite: COUN 6300
COUN 6410 Career Development Lab (1)
This lab will allow students to practice administering and interpreting career assessments and interest inventories. Co-requisite: COUN 6400

COUN 6510 Multicultural Counseling Lab (1)
Students will engage in multicultural experiences to explore beliefs, attitudes, values and concerns in order to enhance self-awareness, multicultural counseling competencies and advocacy. Co-requisite: COUN 6500

COUN 6610 Psychological Assessment Lab (1)
The purpose of this lab is to practice administrating and interpreting assessments. Each student will be responsible to provide a written interpretation that incorporates relevant client background information with the assessment results. Co-requisite: COUN 6600

Option I or Option II (6 semester hours are required)

Option I
Choose two elective courses for a total of six semester hours

COUN 7010: Special Topics in Counseling (3)
Research and Discussion in Special Topics in Counseling. Analysis of the issues facing the practitioner in contemporary society. Contact department for offering. Consent of professor is required.

Option II

COUN 7840 Thesis (6)
This course requires the student to complete an original research project in the professional counseling field with the guidance and direction of the student's major advisor. The student will defend the thesis to his/her advisor and advisory committee. Prerequisites: Research Methods in Counseling, completion of at least 33 semester hours within the counseling program, and consent of instructor.

Clinical Practice Sequence (9 semester hours)

COUN 7500 Counseling Practicum (3) (100-300 Clock Hours)
The purpose of the counseling practicum is to introduce graduate counseling students to the practice of counseling with actual clients at a site commensurate with the student's professional interests. Prerequisites: Counseling Theory, Counseling Ethics, Psychological Helping Skills, Group Counseling. Co-requisite: Psychopathological Diagnosis

COUN 7510 Counseling Internship (3) (300 Clock Hours)
The internship is designed to enable students to practice their skills at their internship sites and to carry out all of the activities and functions that employed counselors perform. Prerequisite: Counseling Practicum and consent of professor.

COUN 7520 Counseling Internship (3) (300 Clock Hours)
The internship is designed to enable students to practice their skills at their internship sites and to
carry out all of the activities and functions that employed counselors perform. Prerequisite: Counseling Practicum and consent of professor.

Academic Advising/ Faculty Advisors

Academic advising is an integral part of the student’s overall educational experience. A faculty member serves as an academic advisor who assists the students in choosing an academic major, as well as developing a program of study consistent with the student’s life goals. Advisors provide students with up-to-date information concerning institutional policies, procedures and programs. In addition, advisors make referrals to other support services on campus.

Each student is encouraged to communicate with his/her advisor concerning contemplated changes in schedule, changes in educational or career plans, and academic problems or questions. Although advisors provide guidance and assistance to students, it is ultimately the responsibility of each student to be familiar with the requirements of his/her program of study and this document.

Advising

Each student is assigned a faculty advisor when admitted to the program. The advisor assists students in selecting a course of study and assists in on-going evaluation of the student's academic, personal, and professional development. Prior to completing the third semester, the student and advisor should plan the student's overall program, keeping in mind that the plan may be revised, as needed. The assistance of the advisor does not relieve the student of responsibility for completing required work and following program and university procedures. In situations where student grades and evaluations indicate a student's inappropriateness for the program, program faculty assists in facilitating the student's change to a more appropriate field.

As a student beginning the Clinical Mental Health Counseling master’s program, there are several issues to keep in mind as you register for courses.

• The co-requisite for enrolling in Practicum (COUN 7500) is COUN 7300: Advanced Clinical Mental Health Counseling.

• COUN 7300: Advanced Clinical Mental Health Counseling has the following perquisites.
  - COUN 6100 Psychological Helping Skills
  - COUN 6110 Psychological Helping Skills Lab
  - COUN 6200 Counseling Theory
  - COUN 6210 Counseling Theory Lab
  - COUN 6300 Group Counseling
  - COUN 6310 Group Counseling Lab
  - COUN 7100 Psychopathological Diagnosis (Co-requisite)

• Clinical Practice Sequence:
  - COUN 7500 Counseling Practicum is offered during the Summer
  - COUN 7510 Counseling Internship I is offered during the Fall
  - COUN 7520 Counseling Internship II is offered during the Spring
Supervised Clinical Experiences

Three levels of supervised clinical work in the counseling program at UNG are required of students matriculating towards the M.S. degree: labs, practicum, and internship. The following is a brief description of what these components entail.

Labs

In conjunction with most core counseling courses, co-requisite lab experiences are offered. These lab activities allow students to directly apply knowledge from a specific course in a supervised clinical experience. For example, students in the Counseling Theories course use several theory-based counseling interventions with a volunteer client; Career Development students administer and interpret a battery of career assessment instruments; and Group Counseling students function as a group facilitator or apply group evaluation techniques to recorded group sessions. In other courses, students work with client populations (e.g., children, adolescents, older persons, families, couples) appropriate to course content.

Practicum

In counseling practicum, the primary focus is becoming oriented and integrated in a clinical placement and demonstrating individual counseling skills. Students complete a supervised practicum that totals a minimum of 100 clock hours. The experience provides for the development of counseling skills under the supervision of a faculty member and a chance to become familiar with professional activities other than direct service work.

Internship

During the counseling internship process, the focus shifts to the actual practice of the role of counselor as an entry-level counselor. A student completes 2 semesters of internship for a total of 600 clock hours, after successful completion of practicum. The internship provides (1) an opportunity for the student to perform all the activities that a regularly employed staff member in the setting would be expected to perform, (2) familiarity with professional activities other than direct service work, and (3) supervised experience in the use of professional resources (e.g., appraisal instruments, computers, print and non-print media, professional literature, and research).

Please review the UNG Clinical Mental Health Counseling Clinical Handbook for more information.
Progressing through the Graduate Program

The Clinical Mental Health Counseling program serves both traditional and non-traditional students, and it can be tailored to meet a student's individual needs. It may be helpful for a student to consider the following:

1. Become familiar with the procedures of the University (See UNG Student Catalog).
2. Know the academic year, both for the University and for the program.
3. Get to know your advisor. Meet personally with your advisor early in your course work, and use him/her for advice and counsel.
4. Course work frequently requires students to confront personal and professional issues, both situational and developmental in nature. Students' openness to self-examination and constructive feedback are integral parts of professional development. Moreover, as professionals who adhere to the Code of Ethics (American Counseling Association (ACA)), the counseling faculty members are committed to an on-going screening process designed to assist students whose issues interfere significantly with their progress in the program (See Procedures for Reviewing Student Competency).

Student Assessment

Counselor educators and counselors-in-training are required to abide by all ethical standards set forth by the American Counseling Association (ACA Code of Ethics 2014). Specifically, Standards F.8 Student Responsibilities and F.9 Evaluation and Remediation of Students. There are two ways in which counselor educators assess student effectiveness, which include academic performance (grades) and professional and personal aptitude and behavior. Procedures for reviewing student competency in these two areas are outlined below under the headings, Academic Standing Policy and Professional and Personal Aptitude and Behavior.

Course Grading Policy

All Clinical Mental Health Counseling lecture courses are graded on a 4.0 scale with the following values: A=90% or above, B = 80% - 89%, C=75% - 79%, D=70%-74%, and F = below 70%. A grade of A or B is required in all courses. A grade of U (Unsatisfactory) is equivalent to failing a course or lab class with a grade of F. Students must retake a course if they receive a grade of C or below in order to apply the course toward graduation.

Academic Standing Policy

Graduate Clinical Mental Health Counseling students whose academic performance or professional and personal aptitude and behavior are unsatisfactory will be subject to the following:

1. Probation — A student will be placed on probation for any of the following reasons:
   a. Student's cumulative grade point average falls below 3.0.
   b. Student earns a C, D, or U in any required or elective course.
c. Student has displayed professional and personal aptitude and behavior that is identified as problematic by faculty members.

No student may be a candidate for the degree or sit for the comprehensive examination while on probation. Probation will be removed when the student's GPA reaches 3.0 or higher. In cases where the student is placed on probation due to grade(s), probation will be removed when the course(s) is/are repeated and the grade is S or B or greater, and the overall GPA is 3.0 or greater. Students who earn a grade of C, D, or U in a required or elective course must repeat the course and receive a grade of B or better (including S) on the second attempt or be suspended from the program. For non-academic circumstances, probation will be removed when students successfully complete remediation. Students who are on probation should not register until advised. Students must also receive a grade of S for all laboratory courses. Students who receive a grade of U for any Laboratory course must complete both lab course and the corresponding co-requisite.

2. Repeating a Course – A student who is on probation for grades (she or he earned either a C or D in a course) must repeat that course and earn an A or a B. To protect the integrity of the repeated course, the student may have 3 options for repeating the course.

   a. The student can take the same course again with the same instructor.
   b. The student may take the same course as a transient student at another university. It is the student's responsibility to provide the CMHC department curriculum committee with a syllabus from the course before taking said course. The curriculum committee will determine if the course is equivalent or not to the CMHC course.
   c. The student may contract with another CMHC faculty member to take the repeated course as an independent study.

The determination of which of these 3 options for how the student will repeat the course will be a joint decision between the student and the Department Head.

3. Suspension — A student will be placed on suspension for any of the following reasons:

   1. Student earns two grades of C, D, or U in a required or elective course(s).
   2. Student earns one grade of F in any course in the program (including electives).
   3. Student has already served three consecutive terms on academic probation.
   4. The student has displayed professional and personal aptitude and behavior that is identified as "impaired" by faculty members.
   5. The student fails to show progress on remediation plan.

No student may enroll in graduate courses at UNG while on suspension. Courses taken at another institution during the period of suspension will not be recognized for transfer credit. Students seeking to reapply who have been suspended for academic reasons must submit a new application and a letter written to the Dean of the College of Health Sciences & Professions, after a period of one year from the date the student was removed, laying out a rationale for their readmission. They will be readmitted only upon approval of the Dean and the Clinical Mental
Health Counseling Admissions Committee. Students seeking to reapply who have been suspended for professional and personal aptitude and behavior should follow the procedures outlined below under the heading, Professional and Personal Aptitude and Behavior.

4. Dismissal — A student will be dismissed from the program for the following reason:
   a. Student is unable to eliminate impairment based on cognition, affectivity, interpersonal functioning and/or impulse control.

Appeal of Grades Obtained in Graduate-Level Courses

The procedure for student complaints concerning faculty-grading practices will be as follows:

1. The course syllabus is considered an agreement between the instructor and student. If classroom procedures outlined on the syllabus conflict with institutional policies, institutional policies shall supersede the syllabus. A student who believes a grade violates classroom and/or institutional policy should first, within the first 30 calendar days of the start of the subsequent semester, attempt to resolve a grade appeal directly with the instructor.

2. If this attempt fails, the student must, within the first 30 calendar days of the start of the subsequent semester, submit via college email a written appeal to the instructor’s campus-based administrator, copying the instructor as well as the associate dean of the college, requesting mediation in his/her grade appeal. The campus-based administrator will facilitate a dialogue between the student and the instructor within 14 working days of receipt of the written complaint. If the complaint cannot be resolved at the department level, the associate dean will review the complaint and render a decision.

3. In instances that cannot be resolved at the departmental/campus or college level, within 30 calendar days of the decision reached in step 2 above, the student will complete and submit a Grade Appeal form (available on the Academic Affairs website), including supporting documentation, to the Associate Provost for Academic Administration or campus-based designee. Academic Affairs will, within 14 working days, schedule the hearing as well as elicit additional information from all parties involved (i.e., student, instructor, department chair, campus administrator, dean) necessary for the Student Grade Appeals Committee to conduct the hearing.

4. The faculty pool for the Student Grade Appeal Committee will be chosen in the following manner:

5. Each year, the Faculty Senate/Leadership Appointments committee will select a pool of faculty members with representation from each college. When a student grade appeal is submitted to the Associate Provost for Academic Administration or campus-based designee, three faculty members will be selected to serve as a Student Grade Appeal Committee for that particular appeal. A committee chair and a recording secretary will be designated.

6. Faculty from the same degree program as the instructor(s) involved in the appeal will not serve on the committee. Faculty from the same degree program of the student’s academic major will not serve on the committee.

7. Faculty who are potentially biased against or in favor of the student or the involved instructor(s) will not serve on the committee.
8. The aggrieved student and each involved instructor may strike one member from the panel without prejudice.

9. The committee functions in the following manner:

10. The committee investigates the circumstances of the appeal, allowing both the student and the involved instructor(s) to present their cases. The student and the instructor have the option of addressing the committee in person or providing the committee with a written statement of appeal in lieu of appearing in person. Both the student and the instructor(s) may name other individuals with relevant, first-hand information to address the panel in person or in writing. If the student chooses to address the committee in person, he/she has the privilege of bringing one advisor, selected from the faculty, staff, or student body, to the meeting. The advisor is not allowed to address the committee or to ask questions of committee members during the meeting. The student is allowed, during the meeting, to confer privately with the advisor. The student and the instructor(s) have the right to remain in the room while testimony is being given. All oral testimony will be recorded. If the student chooses to provide the committee with a written statement of appeal in lieu of appearing in person, the student will be required to submit a signed statement indicating that he/she has chosen not to meet with the committee. If there are follow-up questions from the committee, they will be mailed to the student, along with a request that they be answered in writing.

11. After considering all information relating to the appeal, the committee will formulate recommendations based on the decision of the majority.

12. The committee will forward a record of the hearing and a recommendation to the Office of the Provost.

13. The Associate Provost for Academic Administration will review the recommendation. It will be the responsibility of the Associate Provost to render a decision in the case, whereupon the student, the department head and the faculty member shall be advised in writing. If circumstances warrant, the Provost shall have the authority to change a student’s grade upon recommendation of the committee.

In the event the student wishes to appeal the decision of the Associate Provost, he/she may direct his/her appeal in writing to the Provost within five business days from the receipt of the letter sent by the Associate Provost. The decision of the Provost shall be final and binding.

**Professional and Personal Aptitude and Behavior**

Potential counseling effectiveness cannot be assessed in the same manner as academic performance in typical college classes. Students must communicate effectively, be open-minded, tolerate ambiguity, exhibit a high degree of patience, acceptance of diversity, and demonstrate emotional stability and self-acceptance. Counseling faculty at UNG will evaluate student’s professional and personal aptitude at the end of every fall and spring terms. Students are required to meet with their advisor to discuss the outcome of the evaluations. This process is designed to enhance communication and mentoring within the program.

Students are expected to be able to adhere to the following professional performance criteria:

1. Openness to new ideas
2. Flexibility
3. Cooperativeness with others
4. Willingness to accept and use feedback
5. Awareness of own impact on others
6. Ability to deal with conflict
7. Ability to accept personal responsibility
8. Ability to express feelings effectively and appropriately
9. Attention to ethical and legal considerations
10. Initiative and motivation

When student competency concerns arise, faculty members are obligated to assist students in every way possible to be successful in the program.

It is the objective of the University of North Georgia Clinical Mental Health Counseling faculty to identify concerns regarding student competency as early as possible and to initiate remediation. Students with competency concerns can be identified both in and out of the classroom at any time during matriculation in the Clinical Mental Health Counseling Program. Students are assessed on counseling competencies at the end of the fall and spring semesters by the entire faculty. Students also complete a self-assessment each semester. The focus will include the ten core competencies identified in the counseling profession.

Occasionally, students experience discomfort and struggle with awareness of issues during matriculation in the program. However, faculty members are ethically required to bring attention to any concerns we deem inappropriate (e.g., substance abuse, violent behavior, verbally abusive language, intolerance) that compromise the safety (emotional and physical) of classmates, clients, and future clients. The following procedures were developed in order to address such issues:

1. When a concern arises, the faculty member will informally bring that concern to the student's attention either in a face-to-face conversation or via e-mail or phone contact.

2. The professor will report the informal conversation at the next available faculty meeting under "Student Issues" on the agenda as documentation of the incident. The professor will seek consultation with other members of the Clinical Mental Health Counseling faculty for suggestions or recommendations to address the issue. At this point, remediation may be considered or the student may be given time to address and rectify the issue on his/her own. Follow-up documentation will consist of end-of-semester evaluations.

3. When an instructor believes a student is not making adequate progress after an informal intervention, the faculty member(s) and Department Head will consult and formally meet with the student to discuss lack of progress in the program. At that time, the student will be placed on probation and recommendations or requirements for remediation presented. Faculty will complete the Student Remediation Form, which will include expectations and the specified time period the student has to meet expectations. If the student feels remediation is unjust or unfair, the student can appeal the faculty decision by following the procedures listed below.

4. All documentation will include signatures of faculty, students, and Department Head and kept in the student files located in a locked cabinet in the Department of Clinical Mental Health Counseling.

5. Faculty members will monitor students who are participating in remediation during weekly faculty meetings and will collectively determine whether students are making progress. Faculty will meet with students periodically to review progress of remediation. Minutes of these meetings will be kept on file.
6. Unsatisfactory progress occurs when either the student does not meet the expectations of the faculty or behaviors worsen during the specified time period of remediation. A meeting will be called with the student, all counseling faculty, the department head and one representative chosen by the student for support. The student will be suspended from the program and conditions for re-admittance presented.

7. If the student believes the evaluation is inequitable, the student is allowed to appeal the decision of the faculty for suspension or dismissal.
**Student Remediation Appeal Process**

- Deadline to appeal (date and time), which must include three full working days, will be given in writing to the student during the meeting.
- Student must complete the Intent to Appeal Form and submit the form in person to the Dean of the College of Health Sciences & Professions prior to the deadline.
- If three days pass without notifying the Dean, the student forfeits the right to an appeal, and the program requirements/decision will stand.
- Student will be withdrawn and a hold will be placed on registration.
- In cases of appeal, the Dean will appoint an ad hoc Student Competency Review Committee of three faculty members, within three working days of receipt of the student's appeal.
- The committee will consist of one faculty member designated by the instructor initiating the competency report, one faculty member designated by the student, and one faculty member designated by the Dean who will serve as chair of the ad hoc committee.
- Ad hoc Student Competency Review Committee will require a written statement and any accompanying documentation from the instructor and student and then will hold an oral hearing where the views of the instructor and the student will be heard. Oral arguments will be audio-recorded.
- Student will be allowed to go first followed by the faculty member.
- Faculty member will be allowed in the room while the student is presenting oral arguments.
- Both the student and faculty member are allowed to have one advisor of his/her choosing present; however, the advisor is not allowed to speak on behalf of the student or faculty member to the committee.
- Both the student and the faculty member are allowed not more than 15 minutes to present their respective cases and time will be kept by the chair of the ad hoc committee.
- Following the oral presentations, the student and faculty member will be asked to leave and the committee will meet to discuss their recommendations. Only qualified counseling faculty/mental health professionals may determine whether or not a student is considered "impaired." Therefore, the ad hoc Student Competency Review Committee may only identify whether or not a student has received adequate notice of professional and personal aptitude and behavior, remediation and an appropriate amount of time to meet expectations. Recommendations can address the method of notification of impairment, the reasonable nature of remediation with regards to the impairment or the amount of time the student has in which to show improvement.

8. Ad hoc Student Competency Review Committee will then make recommendations to the Dean of the College of Health Sciences and Professions within ten days of its appointment. The Dean will then send a letter to the student with copies to the student's
file, Clinical Mental Health Counseling Department Head, and the Associate Vice President of Academic Affairs.

**Dismissal of a Student from Graduate Studies**

1. Students dismissed from the university and one of its graduate programs shall have the right to appeal.
2. Students are encouraged to attempt to resolve appeals through the program coordinator/director and, if necessary, through the appropriate academic dean.
3. In instances that cannot be resolved at the program or college level, the appeal will be forwarded to the Dean, Graduate Studies, for consideration.
4. Students must notify Graduate Studies in writing of the intention to appeal the dismissal. This notification must be received within 30 days of the notification of dismissal, or the right to appeal is forfeited.
5. The appeal will be heard as soon as possible so that, if the appeal is successful, the student will be readmitted to the program with a minimum of interruption. However, the student will not be allowed to enroll while his/her appeal is pending.
6. The members of the Dismissal Appeal Committee will be the Chair, who is also Dean of Graduate Studies, and members of Graduate Council.
7. The committee functions in the following manner:
   a. Prior to the hearing, the committee will investigate the circumstances of the appeal, allowing the student and the program coordinator/director to present their cases in writing. If the program has a dismissal-appeal process, the program committee will also submit, in writing, a summary or documentation from the program’s hearing process.
   b. The committee will schedule a hearing, making every conceivable effort to identify a date, time, and place when the student and instructor will be able to attend.
   c. During the committee hearing, both the student and the program coordinator/director will be allowed to present their cases. The student and the program coordinator have the option of addressing the committee in person or providing the committee with a written statement of appeal in lieu of appearing in person. Both the student and the program coordinator/director may name other individuals with relevant, first-hand information to address the panel in person or in writing.
   d. If the student chooses to address the committee in person, he/she has the privilege of bringing one advisor, selected from the faculty, staff, or student body, to the meeting. The advisor is not allowed to address the committee or to ask questions of committee members during the meeting. The student is allowed, during the meeting, to confer privately with the advisor.
   e. If the instructor (and, if applicable in clinical or internship situations, the clinical instructor or on-site supervisor) additionally chooses to address the committee in person, he/she may bring one advisor, selected from the faculty or staff, to the meeting. The advisor is not allowed to address the committee or ask questions of committee members or any other attendee during the meeting. The instructor is allowed to confer privately with the advisor during the meeting.
   f. The student and the instructor(s) have the right to remain in the room while testimony is being given. All oral testimony will be recorded.
g. If the student chooses to provide the committee with a written statement of appeal in lieu of appearing in person, the student will be required to submit a signed statement indicating that he/she has chosen not to meet with the committee.

h. If there are follow-up questions from the committee, they will be mailed to the student or program coordinator/director, along with a request that they be answered in writing and promptly submitted.

i. After considering all information relating to the appeal, the committee will formulate recommendations based on the decision of the majority.

j. The chair will forward a record of the hearing and a recommendation to the Office of Academic Affairs.

k. The Associate Provost for Academic Administration will review the recommendation. It will be the responsibility of the Associate Provost for Academic Administration to render a decision in the case, whereupon the student, the program coordinator, and the appropriate dean shall be advised in writing.

l. In the event the student wishes to appeal the decision of the Associate Provost for Academic Administration, he/she may direct his/her appeal in writing to the President within five business days from the receipt of the decision letter.

m. If the student is not satisfied by the final decision of the President, he/she may apply to the Board of Regents for a review of the decision. The application for review must be submitted in writing to the Board’s Office of Legal Affairs within a period of twenty days following the decision of the President. It shall state the decision complained of and the redress desired.

**Application for Candidacy**

When students earn 35 semester hours of graduate course work in their program, they should file for admission to candidacy by completing a Plan of Study form. This application is a check sheet approved by the students’ adviser, department chairperson and college dean listing all course work to be offered for the degree (included transferred credit and courses in progress). After getting the required signatures, students should submit their plan of study to the university Registrar’s office.

**Comprehensive Exams**

The Clinical Mental Health Counseling Program is a competency-based degree program. Before students successfully complete work in the program, they are expected to demonstrate knowledge of theories of human development; knowledge of counseling theories and techniques; knowledge of social and cultural foundations; skills in individual, group, and family counseling; a thorough understanding of ethics; understanding of the counseling needs of multicultural populations, career and lifestyle development, and professional orientation; understanding of appraisal, research and evaluation in counseling; satisfactory performance as a member of a community/mental health agency during their clinical field placement; and demonstration of the personal and professional qualities expected of entry-level counselors.

Students enrolled in the Clinical Mental Health Counseling program are required to pass a comprehensive exam with a grade of 75% or higher during their last semester of enrollment. Comprehensive exams must be completed by the last day of classes of the graduating term. Each
student will receive two opportunities to successfully pass the Comprehensive Exam during their last term in the program. Report of successful completion is due in the Registrar's Office by the end of the final examination period. If a student is unable to pass the comprehensive exam after the second attempt, he/she will have an opportunity to re-take the exam during the next administration. Comprehensive exams are administered every Fall and Spring.

**Time Limit**

All work offered for the Clinical Mental Health Counseling master's degree, including accepted transfer or post-baccalaureate credit, must be completed within a **six year** period. This period begins with the beginning date of the earliest course offered for the master's requirements and ends six years thereafter.

**Endorsement Policy**

The Clinical Mental Health Counseling program was specifically and carefully designed to prepare counselors who are competent to enter work in professional settings. Concentrated preparation is essential for graduates to become effective and fully functioning professionals. Therefore, endorsements for Clinical Mental Health Counseling graduates can be given only for professional positions and position levels appropriate to the program. Furthermore, it is the discretion of the counseling faculty to provide a professional reference or recommendation, which is based on the student’s competency level and personal characteristics.

**State Licensure & National Certification**

Upon graduating from UNG’s Clinical Mental Health Counseling Masters program, students are eligible for licensure as a Professional Counselor in the state of Georgia. Other requirements include passing the National Counselor Examination and 3 years post-masters clinical supervision.

**Professional Organizations**

Students and graduates are encouraged to join and become active in professional organizations (or associations). One method to remain current in the profession is by participating in professional organizations by presenting papers at various conferences, serving on committees, writing for professional journals, attending workshops, and becoming active in leadership.

While there are many benefits to be derived from membership in a professional organization, only the primary ones are noted here. As a member of a professional organization, you:

1. Receive the publications.
2. Are entitled to reduced membership rates and reduced registration rates for professional meetings sponsored by the organization.
3. Are eligible for member services (e.g., professional liability insurance, legal defense fund, library resource use, etc.)
4. Have a method of direct involvement with activities and issues directly or indirectly pertinent to your profession.
5. Are affiliated with other professionals having interests and areas of expertise similar to yours.
6. May remain current in the knowledge, practices, and research findings in the field.

The primary national organization to join is the American Counseling Association (ACA). The primary state organization is the Licensed Professional Counselors Association of Georgia (LPCAGA). There are also divisions within the organizations for counseling specialties (e.g., College Counselors, Specialists in Group Work, Career Counselors, International Association of Marriage and Family Counselors, International Association of Addictions and Offender Counselors, and Mental Health Counselors). Students are strongly encouraged to join Chi Sigma Iota, the professional counseling international honor society.
