	EDUC 6040 CS Teaching Practicum *Online*	-Digital Citizenship Plan -Ed Tech Growth Plan -Annotated Resources -Field Experience Form -Program Portfolio	~1 hours per week

Important COE Graduate Policies for GenCyber CS Endorsement Candidates:

- All the Endorsement courses in the GenCyber AGENT program are for GaPSC PLU credit (not UNG graduate credit.) The grant is unable to pay graduate credit tuition.
- PLU courses adhere to university guidelines for graduate students. All graduate students are allowed to have one "C" in their program. If students receive a second C, they will be on academic probation for one year after which they may re-enter the program at which time they will have to repeat the course.
- Finally, the AGENT proposal for the GenCyber grant will pay for your tuition for each program course during the first attempt of the course only. If you fail a course and must repeat it, you will need to pay for the course separately.
- Due to accreditation requirements, the CS Endorsement credential cannot be awarded without key assessments being submitted to Anthology including the portfolio, field experience, and other assignments.
