"I found early on during my time studying abroad a core principle that still holds true as I serve in the Army today. If you speak to someone in their second language, you speak to their mind. If you speak to someone in their first language, you speak to their heart. Holistically it provided me the opportunity to understand different cultures at

a deeper level beyond what can be comprehended from a textbook or the internet. Ultimately It helped me fully embody the Cyber-Language-Leader concept that UNG instills in their cadets."
