

DNP Program Outcomes

1. Optimize scientific underpinnings for advanced nursing practice.
2. Lead the integration of system theories, health economics and ethics resulting in improved quality and health outcomes.
3. Critically appraise the literature to evaluate evidence-based practices that result in safe and effective clinical outcomes.
4. Incorporate information systems and patient care technologies to maximize healthcare outcomes.
5. Analyze social determinants of health (SDOH) at all levels to impact healthcare for individuals and populations.
6. Facilitate interprofessional collaborative practices that improve patient and population outcomes.
7. Enhance population health through advocacy for clinical prevention, healthcare access, and social needs.
8. Apply scholarly activities to improve system changes and promote safety through innovative evidence-based practice
9. Demonstrate leadership skills to create change in complex healthcare systems.
