

# Tips for scanning documents with a cell phone

## Scanning Documents with an iPhone

- Open **Notes** on your iPhone or iPad.
- Create a **new note** or tap on an existing one to add a document to it.
- Tap the **camera button** at the bottom of the screen or above the keyboard.
- Tap **Scan Documents**.
- Line up the **document** you want to scan.
- Tap the **shutter button** if the scanner doesn't automatically scan the document. Repeat this step for every document you want to scan.
- Tap **Save** after you've scanned all of the necessary pages. The button will have a count of how many pages you scanned.
- The scanned pages will populate in a new note in the Notes app.
- Email the note to yourself.

## Additional setting options you may need for iPhone:

- Settings - Notes - activate "On My iPhone" Account slider
- need iOS 11 or later to have access to the scanning function in the Notes app. Settings-->General-->About-->Software Version
- troubleshooting tips here: <https://www.softwarert.com/cannot-scan-documents-notes-iphone-ipad/>

## Scanning documents with an Android phone

1. Open the Google Drive app. (If you do not have a Google Drive, you can get it through the Play Store. It's free.)
2. In the bottom right, tap Add.
3. Tap Scan.
4. Take a photo of the document you'd like to scan.
  - Adjust scan area: Tap Crop.
  - Take photo again: Tap Re-scan current page.
  - Scan another page: Tap Add.

5. To save the finished document, tap Done.
6. Email the page to yourself.
