COVID-19 ISOLATION & QUARANTINE GUIDANCE

Are you experiencing COVID-19 symptoms? They include (but are not limited to):

- Fever over 100.4°F or 38°C (Without having taken any fever-reducing medications, such as acetaminophen or ibuprofen.)
- Loss of smell or taste
- Cough
- Muscle aches
- Sore throat
- Shortness of breath
- Chills
- New or unusual headache
- Nausea, vomiting, diarrhea, or loss of appetite

I don’t have symptoms, but I have had direct or close contact with someone who has been diagnosed with or tested positive for COVID-19.

Fully vaccinated
If you are boosted or have become fully vaccinated within the last 6 months (Moderna or Pfizer vaccine) or within the last 2 months (J&J vaccine):

- You do not need to quarantine at home.
- You should wear a mask around others for 10 days.
- If possible, get tested on day 5.
- If you develop symptoms, get tested and isolate at home until test results are received, then proceed in accordance with the test results.

Not vaccinated
If you are unvaccinated or became fully vaccinated more than 6 months ago (Moderna or Pfizer vaccine) or more than 2 months ago (J&J vaccine) and have not received a booster:

- You must quarantine at home for 5 days. After that, continue to wear a mask around others for 5 additional days.
- If possible, get tested on day 5.
- If you develop symptoms, get tested and isolate at home until test results are received, then proceed in accordance with the test results.

Students will be contacted by the Dean of Students to review academic accommodations.

Employees will be contacted by Human Resources to review leave options.

Consult the most current isolation and quarantine guidance from the Georgia Department of Public Health at dph.georgia.gov/dph-covid-19-guidance.
